Japanese government strongly supports us in various countries.

Bangladesh

We also want to be Poly-Glu Ladies, in Bangladesh.

Even though the company has such a great technology, an SME without funds, language skill, information or human resources can never work overseas. Japanese SMEs have high technology, are enthusiastic about their work, and continue the efforts. They have kind hearts and are not greedy.

Only if the government supports them, they can achieve results of "WIN-WIN-WIN" .

The budget to make only one shallow well can make a water purification system to supply water to 5,000 persons.

It's a small budget.

POLY-GLU can solve the water related problems in this country within 3 years only if there are your understanding and cooperation.

India

Poly-Glu Boy in India

In addition, POLY-GLU Lady and Boy will solve the water issues in the world. Users are happy to pay the fee. Many new jobs will be also created. The world will respect and welcome Bangladeshi youth not as laborers, but as water experts.
