

## Joint Venture in China

Since November 2019, we have granted exclusive sales rights to the Shanghai South-South International Trade Promotion Center to jointly work for the improvement of water environment by jointly working for safe drinkable water, industrial wastewater treatment and lake & river pollution control in China.

**Signing Ceremony**

**Representatives  
of both the Companies**

The two leaders have already agreed that international development projects in African countries will be promoted in a coordinated manner.

Our company and Shanghai South-South International Trade Promotion Center will make use of each other's track record and experience.

However, with the swiftness of “quick work philosophy”, which is a characteristic of private companies, we signed a contract to promote the spread of our technology in Africa.
